

Speech:

The North Atlantic Treaty Organization is a global threat to peace and security, and they now have clear pathways to implementing AI-enabled weapon systems, specifically Lethal Autonomous Weapons Systems, known as LAWS. This means that the United Nations shouldn't impose additional restrictions on the deployment of these systems for defensive purposes because they are what will protect us from these dangerous global aggressors. The Democratic People's Republic of Korea's resolution on this topic further emphasizes this crucial point by establishing a review board to ensure the safe deployment of LAWS for purely defensive applications. By monitoring these automated weaponry systems, we can reduce civilian casualties and infrastructure damage while increasing our defensive capabilities to protect against imminent threats. Additionally, by helping nations adapt their systems to reduce casualties, we can improve the security of all countries. I urge all nations to endorse this resolution as it ensures that a state's fundamental right to defense is protected using modern artificial intelligence technology.

Additional Notes and Ideas:

Speech:

500,000 dead, and another 22 million displaced. You may initially think I'm referring to a world war or a global pandemic, but you would be mistaken. Instead, these tragedies all occurred in one country, Syria, because of hostile rebel groups. A plethora of nations have supplied these catastrophic rebel groups with weapons, soldiers, and training. Although these nations must be held accountable, the objective of this resolution is not to do this; instead, this resolution is for the people of Syria. These tragedies have occurred for far too long, so it's time that we implement a viable framework to disarm these rebel groups and restore peace to the nation. By effectively halting the inflow of arms to any rebel groups in Syria and by establishing neutral zones that will disarm the rebel groups with existing weapons, we will effectively end the Syrian Civil War. and restore order to the region. Whether you have supplied arms to these rebel groups in the past or simply feel compelled to aid the desperate people of Syria, I strongly urge you to stand with the Democratic People's Republic of Korea and support this thorough resolution.
